2. Configuring phone

1.1 Configuring via keypad

Language Setting: The default language of the phone is English, it supports Chinese, Russian, Arabic, German, French, Portuguese, Turkish, Spanish, Hebrew, Hungarian, Italian.

Press Menu- input default password 123- Preference- Language to edit the language list, choose the one you'd like to set on the phone.
Note: The available language maybe different, it depends on the language packs currently loaded to the IP phone.

Network Setting:

Press Menu- input default password 123- Network- modify connect type mode/ check IP address/VLAN/Web server to enter the internet related configuration page.

Or review its current IP address by pressing ⊘ key when it is powered on and connected to the network.

Account Setting:

Press Menu- input default password 123- SIP Account- Enter to configure the account setting. You can refer to the bellow 'Configuring via Web page' for the parameter details.

1.2 Configuring via Webpage

2.2.1 Login to web

Modify your computer's IP address to the same network as A11. Enter A11's IP address in the web browser and press Enter, then you will access to A11's user webpage without password.

Click 'admin' which is on the right corner to enter administrator webpage.
2.2.1 Configure phone to register SIP account

a) Network Configuration

LAN Port Configuration

Enter "Network" -> "Basic" page.

There are 3 ways to connect to internet DHCP, Static and PPPoE, please choose one according to your own situation.

✓ Network mode: you can choose DHCP and Static.
✓ DHCP: A11 default to use DHCP to obtain IP from DHCP Server.
✓ Static: If you want to set the IP as static, you should fill IP, Netmask, Gateway and DNS information.
✓ PPPoE: If A11 is connected to the modem, you should fill ADSL account and password which are assigned by your network service provider.

Password Configuration

Enter "Network" -> "Advance" page.
There are 2 modes to set the authority of web accessing and command line: User mode and Admin mode. All the parameters can be visible and changed in Admin mode while part of them can be visible in User mode.

✓ Enable Web Server: enable or disable web access. If choose "no", you can not access A11's webpage.
✓ Admin password: set admin webpage access password.(username:admin)
✓ User password: set user webpage access password.(username:user)

b) Account Configuration

Enter "Account" -> "SIP" page to configure SIP account which is provided from the SIP Server.

✓ Display Name: This name will display on the screen of A11. It will display the name configured for the SIP account by the SIP server preferentially. It can also be kept blank.

✓ User ID: Username of SIP account.

✓ Authenticate ID: normally is the same with User ID, can also be kept blank if there is no special requirement from the SIP server.

✓ Password: Password of SIP account.

✓ Sip Server: SIP server address, support both IP address and domain name.

✓ Sip Port: SIP server port, default is 5060.

After configured and clicked 'Submit' to enable register this account, please check the status of this account in System Status page. The Registration State will be registered if this account registered successfully.

2.3 Wi-Fi

2.3.1   Configure the wifi on the WEB

A21 connect to network via Wi-Fi acquiescently, click "Search Wi-Fi" button to search the available Wi-Fi.

After all available Wi-Fi hotspots are list out, click the round behind the available Wi-Fi which you want to connect.
